PROFILE

Passionate about web development
and technology
Confident in myself and my ability.
Articulate and respectful when working
with others.
Great work ethic
Driven and focused towards achieving
my goals and objectives.

CAREER OBJECTIVE

My objective is to become a great well rounded full stack web dev, able to take on any project with confidence. To work alongside others within my organisation, to learn from them and keep progressing in my career.

WORK EXPERIENCE

Front end web developer

Bittersweet Tattoo Belfast

January 2021 - March 2021 / Belfast, Northern Ireland

- Designed and developed a responsive website so that the client could have a professional online presence to showcase their work and drive new business.
- Market research and compared the good and bad points of other business sites providing a similar service.
- Designed the UI using modern design tools such as Adobe XD and Adobe Photoshop to provide the user with a good user experience.
- Using HTML, CSS/SASS and JavaScript, built the entire site from the UI design, accounting for accessibility and SEO

Front end web developer

Access needs

November 2020 - January 2021 / Portadown, Northern Ireland

- Design and build the entire website so that the client could take their business online.
- Take the clients ideas and create a design that looks good and delivers a great user experience.
- Using HTML/CSS Javascript and PHP, build the site from the design to deployment.

Front end web developer

Sloop Inn restaurant

Apr 2018 - May 2018

- 2020 - 2020
- Worked alongside my client to redesign and developed the entire multipage website into a more modern user-friendly experience

- Worked across the software development life cycle to gather user requirements and build and maintain the code for the website which generated more business for the restaurant.
- Used: JavaScript, HTML/CSS, Bootstrap
- Trained the client in how to update the website.

Front end web developer

DJ Craig Dalzell

March 2021 - June 2021 / Belfast, Northern Ireland

- Find out the clients vision for there site and build a design that looks good, functions well and has all the components that will deliver.
- Build out each component to not only look great, have great user experience.
- Collect content from the client that they want to showcase and to format find a way to show that content whilst thinking of the the best user experience for the end user.
- Set up a hosting service for the client, train them on how to use it and also deploy the site.
- Train the client on how to use and update the site.
